Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 11-20 are not limited to tangible embodiments. In view of Applicant's disclosure, at page 17, lines 6-9 of the specification, "a computer program product, i.e., a computer program tangibly embodied in an information carrier, e.g., in a machine-readable storage device or in a propagated signal", the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g., machine-readable storage device) and intangible embodiments (e.g., a propagated signal). As such, the claim is not limited to statutory subject matter and is therefore non-statutory.

To overcome this type of 101 rejection the claims need to be amended to include only the physical computer media and not a transmission media or other intangible or non-functional media.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 37-39 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Karim *et al.* (6,643,821) who teaches, in Figure 5, grouping and summing content of a packet to produce elements of a vector that represents the content of the packet (508), storing the vector in a memory associated with a processor such that the vector is accessible (512), updating the vector to reflect processing of the content of the packet (504-508) and wherein the vector is representable as

$$C = (C_1, C_2, \dots, C_n) = \left(\sum_i B_{i,1}, \sum_i B_{i,2}, \dots, \sum_i B_{i,n} \right)$$

Allowable Subject Matter

Claims 1-10 and 21-36 are allowed.
